Miami Valley Hospital South: Expanding + Expecting

At Miami Valley Hospital South (MVHS) we are committed to building a healthier community by offering outstanding health care professionals, facilities, and services in an inviting and comfortable setting that's closer to home.

Our attention to detail reflects our dedication to give patients and their families an experience with a personal touch. Whether it's the kind welcome you receive as you enter the building, or the abundance of dark wood and soft hues in the warmly decorated interior, our goal is to make you feel at ease in a tranquil and easily accessible environment.

Expanding A Healing Environment

Our tradition of delivering patient-centered care continues as we unveil a new five-story addition devoted to orthopedic care, spine and joint and medical / surgical patient care. Forty-eight private, spacious rooms feature advanced technology and amenities to enhance a healing environment.

The 220,000-square-foot addition doubles the hospital's original size and brings the experienced physicians and care team you expect from the region's leader. Each of the patient rooms are designed so that physicians, nurses and support services can deliver the personal care each patient needs. Patients will recover in rooms naturally lit by wall-to-wall windows and warmed by wood and limestone accents to promote restful healing. A large sofa and 32-inch flat-screen television will make loved ones' visits much more comfortable, enabling them to better support their family member.

Orthopedic Care / Spine and Joint

The fifth floor of the new addition is dedicated to orthopedic care / spine and total joint care. We tailor treatment to each patient's needs, using specialized experience and advanced technology. Miami Valley Hospital (MVH) Orthopedics performs more inpatient orthopedic surgeries than any other hospital in the region. MVH is the only Spine Center of Excellence in the Dayton region that offers comprehensive services—from pre-assessment through rehabilitation—all in one location.

Our surgical care team is committed to answering questions and taking as much time as needed for our patients to feel comfortable and confident. Our surgeons coordinate patient care and work with patients and their families to facilitate healing and recovery. The experienced team of physicians, surgeons, nurses, and therapists is committed to exceptional patient care and healing, ensuring that the patient experience is supported by individualized treatment.

Medical / Surgical Care

For patients staying overnight, the fourth floor provides all private rooms, which are carefully designed with caregiver stations strategically located nearby. This ensures that nurses are never far from a patient's reach. Quiet acoustics, soft earth tones, and natural light from floor-to-ceiling windows provide a calm and peaceful touch that promotes healing and recovery.

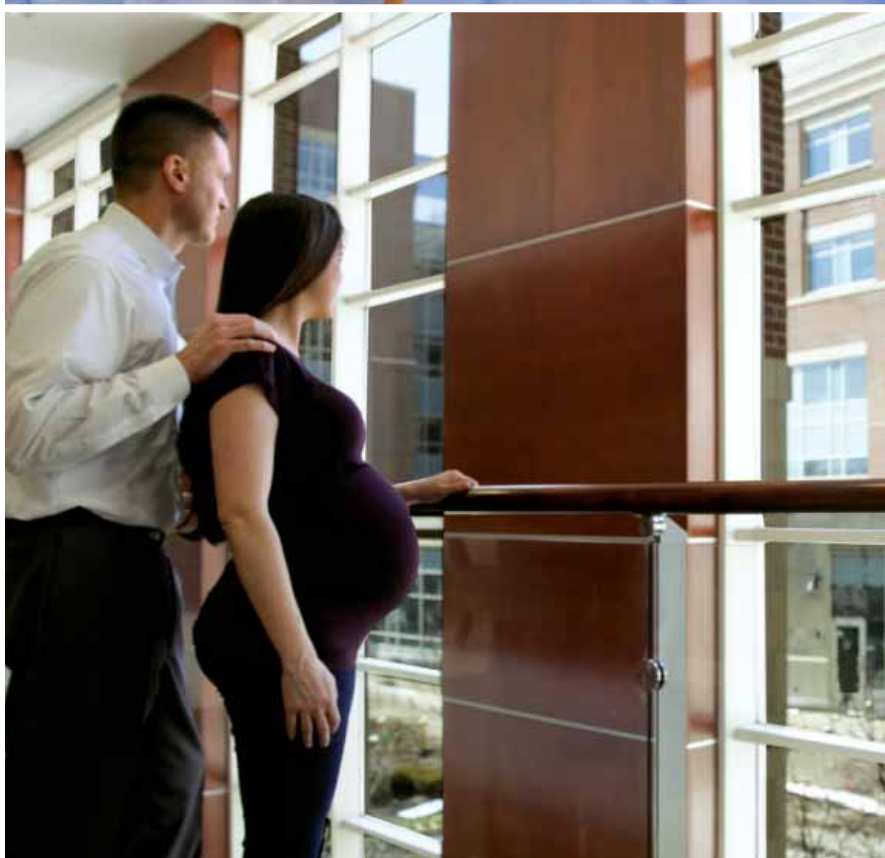

The Surgery Center is staffed by Dayton area surgeons from a variety of specialties and is equipped with eight operating suites furnished with advanced medical equipment. The Center offers a comfortable reception area for family and guests, private pre-operative spaces, and tranquil recovery areas. The Surgery Center is designed to provide you with the best possible experience with a focus on minimally invasive technologies and advanced anesthesia.

Maternity Center

The summer of 2012 will also welcome the arrival of the MVHS Maternity Center which will feature the same expertise, leadership and care patients have come to know and expect from Miami Valley Hospital.

Every detail is being planned to promote a peaceful and enjoyable birth experience

for patients and their families. Whether patients choose a natural birth experience or will need surgical expertise, our birthing and maternity services will combine soothing, spacious surroundings with advanced technology and experienced physicians, nurses and supporting staff.

The Center will include 16 spacious, private after-birthing suites, designed with spa-like amenities, five labor and delivery suites with nearby surgical suites for c-section deliveries, and Level II newborn care. Each room will look out over the lush natural wooded setting of the south campus and loved ones will be welcomed and encouraged to join patients in their room throughout their stay.

Comprehensive Cancer Center

In January 2013, the Comprehensive Cancer Center will open at the south campus. The Cancer Center is a collaborative endeavor of Miami Valley Hospital, area physicians and Radiation Oncology Services. It will enhance patient care by delivering outstanding medical therapies and a variety of supportive services through a team approach. This relationship will provide patients with access to more than 35 physicians and other cancer specialists working in one convenient location.

Experience You Can Count On

As medical technologies and treatment have expanded, so has our commitment to serve the health care needs of families in the surrounding area. MVHS was born out of this commitment and since 2007 its growth has provided patients with experienced quality care that's close to home.

Since its debut, residents have increasingly utilized MVHS services and enjoyed its warm, healing environment. As a result, the location has expanded its array of hospital services to include inpatient care.

Patients First

Our patients can expect the same level of quality, care and expertise they have grown to know and love from the region's leader. With an ongoing commitment to their health and well being, MVHS provides a solid foundation of exceptional care and existing services always placing the patient first.

Emergency Center

The Shaw Emergency Center at MVHS is recognized nationally for service excellence. This 24-hour emergency care facility is staffed by our board-certified emergency physicians trained in the area's only Level I Trauma Center at MVH.

Sports Medicine Center

The MVH Sports Medicine Center specializes in physical therapy and rehabilitation for both surgical and non-surgical sports injuries. The Center is dedicated to getting athletes back to their game and non-athletes back to their active lifestyle.

Breast Center

The Breast Center offers a wide range of breast care services from screening to diagnosis. Our facility offers digital mammography and ultrasound, as well as less-invasive biopsy procedures.

High Risk Breast Cancer Center

Patients will find a comprehensive and compassionate approach to total breast care. The Center provides an emphasis on education and prevention, a commitment to early detection, and access to advanced diagnostics and treatment options. The patient care team includes a certified nurse practitioner, certified genetic counselor, and board-certified physicians.

Laboratory Services

A wide range of clinical lab testing is available at MVHS. With in-house specimen collection and diagnostics experts, testing can take place on the same or following day that it's ordered. This allows for a quicker turn-around time to receive results.

Medical Imaging

Our team of radiologists and other specialists are equipped with sophisticated digital imaging equipment, including advanced cardiac diagnostics. Other services include: X-rays or radiology, CT or computed tomography scans, MRI or magnetic resonance imaging, nuclear medicine and ultrasound.

Premier HeartWorks

At Premier HeartWorks, patients receive a comprehensive assessment of their cardiac risk, offering a convenient, affordable way to start achieving a healthier lifestyle.

Hyperbaric Oxygen Therapy Center

Physician specialists in chronic wound care prescribe hyperbaric oxygen therapy for patients with complex or non-healing wounds.

Physician Offices

MVHS has on-site primary care and specialty physician offices. Specialty services offered include family medicine, obstetrics and gynecology, maternal-fetal medicine, orthopedics, sports medicine, cardiology, neurology, neurosurgery, urology, physical medicine and rehabilitation, dermatology, interventional radiology and infectious diseases, as well as plastic, general and hand surgery.
